Abstract

Pastoral counselling: towards a diagnostic and interpretational approach in Africa

Effective pastoral counselling is influenced by appropriate pastoral diagnosis. A pastoral diagnosis or assessment in Africa should focus on socio-cultural systems thinking, which entails an understanding of the people's worldview of distress embedded in stories. Thus, the process of assessment in Africa should concentrate, among other factors, on the constructive and destructive role of the community and the strength of beliefs in supernatural causes of distress in order to focus the probing and interpretation of the conversation.

Opsomming

Pastorale berading: 'n diagnostiese en interpretasie-benadering in Afrika

Effektiewe pastorale berading word beïnvloed deur toepasslike pastorale diagnose. 'n Pastorale diagnose in Afrika behoort te fokus op sosio-kulturele sisteemdenke, wat die verstaan van mense se wêreldbeskouing van nood, ingebed in stories, behels. Daarom moet die proses van ondersoek in Afrika konsentreer op onder meer die konstruktiewe en destruktiewe rol van die gemeenskap, en die krag van geloof in bonatuurlike oorsake van nood, om sodoende die ondersoek en interpretasie van die gesprek te fokus.

1. Introduction

Pastoral care and pastoral counselling are phrases that are often used interchangeably but it can also be differentiated. Pastoral care
